30693 – FINANCIAL ACCOUNTING MODULE 2

Accounting Department

Academic year 2025/2026
Credit Points: 5

Course Director: Prof. Luca Simone Scarani

COURSE MISSION; CONTENT SUMMARY

Accounting is the language of business, an important means of communication between various business parties. Among others, financial accounting speaks mainly to external information users, such as investors and financial analysts, who make decisions for many different purposes using the accounting information revealed in financial statements.

The course 30693 is the second Module of two (Accounting module 1 is course 30692).

Overall (30692 and 30693), the mission of the course is to provide students with all notions needed to operate in the field of financial accounting. More in detail, it consists of teaching how to prepare the full set of both separate and consolidated financial statements (income statement, balance sheet, cash flow statement) and all the accounts therein included, and how to interpret them according to the general F/S analysis methods. At the end of both courses 30692 and 30693, students should be able to manage, at a basic level, all the issues related to Financial Accounting.

Broadly speaking, the *fil rouge* of the whole course is the following:

30692	30692 and 30693	30693	30693	30693
Sessions 1 to 9	Sessions 10 to 22, sessions 1 to 5	Sessions 6 to 10	Sessions 11 to 15	Sessions 16 to 23
The foundations of the accounting system. The accounting equation, the "pillars" of accounting (balance sheet, income statement); The periodic and adjusting entries in the double-entry system.	*Accounting and measurement of the main items of the balance sheet and the income statement* Revenues, receivables, cost of goods sold, inventories, tangible and intangible assets, liabilities and bonds, owners' equity, investments in other corporations, foreign currency transactions and Value Added Tax (VAT)	*Two key topics: taxes and cash flow statement* The calculation and accounting treatment of income taxes. The preparation of the cash flow statement.	*Financial statements analysis* Focus on reclassification techniques and interpretation of key financial indicators	*Consolidated F/S* Preparation of consolidated financial statements: principles and methods.

That said, the mission of this course (30693) is to complete the learning of the students' basic Accounting skills, focusing on owners' equity, investments, cash flow statement, taxes, F/S analysis and consolidated financial statements.

The course 30693 corresponds to 5 CFU, i.e. to a total workload of 130 hours, and will have 46 academic hours lectures.

The content of the course, overall (30692 and 30693), can be summarized as follows:

1. Understand the accounting methodology with reference to data gathering, processing, classification and recording using the "accounting equation" (A = L + SE) and then the double-entry accounting system.
2. Understand the techniques at the basis of financial reporting preparation (preparation of journal

entries on the basis of the accrual principle, going concern principle, etc.).

3. Understand the adjusting entries and identify the areas which are particularly subject to managerial discretion.
4. Correctly evaluate the main financial statement items, according to law and to accounting principles:
   - Accounting for revenues and receivables.
   - Accounting for inventories.
   - Accounting for non-current tangible and intangible assets.
   - Accounting for liabilities and bonds.
   - Accounting for owners' equity.
   - Accounting for investments in other corporations.
5. Compute and account for income taxes.
6. Prepare a cash flow statement.
7. Reclassify the F/S items according to different methodologies.
8. Analyze F/S with ratios.
9. Prepare consolidated financial statements.

The course refers, where necessary, to International Financial Reporting Standards (IAS/IFRS) and to the main differences compared to US GAAP.

Accounting Module 1 30692 covers topics under items 1 to 4 of the above list (up to bonds).

Accounting Module 2 30693 covers topics under 4 (cont'd from owners' equity) to 9 of the above list.

INTENDED LEARNING OUTCOMES

I. KNOWLEDGE AND UNDERSTANDING

At the end of the course 30693 students will be able to:

- Summarize and illustrate the theoretical tools needed to evaluate the following main financial statement items, according to law and to accounting principles:
  - Owners 'equity.
  - Investments in other corporations.
- Explain the process required to compute income taxes.
- Define the categories where to classify a change in cash in the cash flow statement.
- Illustrate the schemes of F/S reclassification for ratio analysis purposes.
- Describe the main ratios used to analyze F/S (measures of performance, liquidity, and solvency).
- Recognize whether there is or not a "control" as a prerequisite to prepare consolidated F/S.
- Summarize the meaning of the consolidation adjustments when preparing the consolidated financial statement.

II. APPLYING KNOWLEDGE AND UNDERSTANDING

At the end of the course 30693 students will be able to:

- Analyze, evaluate, calculate, and prepare the journal entries related to the following financial statement items, according to law and to accounting principles:
  - Owners' equity.
  - Investments in other corporations.
- Calculate income taxes and prepare the relevant journal entries.

- Compose the cash flow statement.
- Reclassify the items according to the commonly used F/S reclassification schemes for ratio analysis purposes.
- Elaborate a F/S analysis (measures of performance, liquidity, and solvency).
- Prepare consolidated financial statements.

CLASS NUMBER AND INSTRUCTORS

Class	Instructors
12	Scarani – Vincenzi
14	Paris – Wu Y.
15	Neretina – Vincenzi
16	Wu X. – Sintoni
17	Ferrario – Mazzola
18	Scarani – Vincenzi
19	Scarani
40	Demere – Vincenzi
41	Demere – Jamshidnejad
42	Neretina – Fiore
43	Wu X. – Carretta

PREREQUISITES

There are no formal prerequisites to take Accounting 2 exam. You can pass Accounting 2 exam also without passing Accounting 1 exam in a precedent exam session.

Please note/1. *You may decide to sit for the "Accounting 2" – 30693 exam and pass it before sitting (and passing) the Accounting 1 – 30692 exam.*
Nevertheless, as Accounting 2 is the second part of an exam divided in two (Accounting), please keep in mind that ***all the notions you have learnt in Accounting 1 will be asked and will be assumed as known to pass Accounting 2 exam****.*
In other words, although you can pass Accounting 2 before Accounting 1 exam, studying Accounting 1 is necessary to pass Accounting 2.
Please note/2*:* ***Accounting 2 is not an intermediate exam****. The grade of Accounting Module 1 and the grade of Accounting Module 2 will be merged into a single one in the transcript (code 30691, which is the average of Accounting 1 and Accounting 2); nevertheless, please keep in mind that* ***once Accounting 2 is passed, then the grade is registered in the transcript of the student and will never be canceled in future years*** *(according to the rules in force at the date of drafting this Syllabus).*

Frequently Asked Questions about final grade

QUESTION	ANSWER
(REAL) Good afternoon, Professor, I am a third-year student, due to graduate in July, in Accounting module 2, and have just received a final grade of 14/30 from the 15/06 exam. I have checked the Syllabus for module 2, 30693 and it mentions no	Each of the two exams 30692 (Accounting 1) and 30693 (Accounting 2) require a minimum grade (final, i.e. rounded and after any bonus, extra point and curving point) of **18** to "pass" and be registered. Only after the registration in the transcript of both, the

minimum passing grade for module 2, as the grade is averaged with accounting module 1. My question is whether I have passed, given the fact that my average grade for accounting 30691 is 18/30. Please let me know whether this is valid, so I may know if I should refuse my graduation reservation. This is my last outstanding exam, and I would like to continue with graduation in July.	two grades are averaged and rounded (see below the explanation and an example).

COURSE MATERIALS

Attending and not attending students

Course materials are the following:

I. TEXTBOOKS

The textbooks are:

- Robert Libby, Patricia Libby, Frank Hodge, **Financial Accounting**, 12th edition (with Connect), McGraw Hill 2025 – ISBN 9781265144913. Chapters explained in class in the second semester are: 11, 12, 13, Appendix A.
- C. GALLIMBERTI, A. MARRA, A. PRENCIPE. **Consolidation: Preparing and understanding consolidated financial statements under IFRS**, McGraw-Hill Education, 2013.

Please note: **the exact list of topics covered in the exam is presented in a separate file, named "Detailed Content", which will be uploaded on Blackboard.**

By purchasing the Libby book, you will be able to use a "scratch code" that allows you to access the book's online resources, including slides, new exercises, and so on (named "eConnect"). You can also purchase the "scratch code" stand-alone and use all the Mc-Graw Hill online resources.

Note: the Libby book will be available also in a link in Blackboard (not printable, only readable), thanks to the library resources.

Note: the online resources of the books are also accessible through the Bocconi Library, for free. In fact, the Bocconi Library has a subscription to the text. If you want to take this opportunity, here is the link:

https://lib.unibocconi.it/search*ita/?searchtype=r&searcharg=+%09Accounting+and+financial+statement+analysis+-+Module+1&submit=Cerca

Please ask the Librarians directly any questions about the access procedure.

Frequently Asked Questions about Book

QUESTION	ANSWER
The book is too expensive.	We know buying books is an effort for students. Nevertheless, we would like to emphasize that: (A) this book covers not only Accounting Module 1 but also half of Accounting Module 2 so the expense is for 1 ½

	courses (B) buying the book allows you to make exercises of the same book which are at the end of each chapter (C) buying the book allows you to access to Mc-Graw online exercises which are really useful especially for Bonus Quizzes (D) buying the book allows you to study in continuous at home getting well prepared for the exam.
(REAL) I am writing to you because of an exam question, featured in the Accounting and financial statement analysis (30692) general exam of January 14th, 2021. Let me start by stating that I am sending you this Email now (before the results are announced), as I would like to make clear that my issue is genuine and subject-specific and is not raised "to squeeze out another 0.5". If I remember correctly, the question asked (paraphrased) if debentures are tied to a collateral. I answered this question with "True". Afterwards, as I tried to verify my answers, I became aware that in the Accounting textbook, used for this course, debentures are described to be unsecured. I, therefore, assume that my answer will be regarded as false. However, as I continued my research, I was confirmed in my belief that debentures are indeed connected to a collateral in the United Kingdom but are not in the US. I provide proof of these findings at the end of this Email. Surely, I understand that the content of the textbook should normally be paramount to answering (and correcting) exam questions. Nevertheless, this course was neither specifically about US accounting nor US GAAP but always tried to present other accounting practices, and, if possible, even contrast them with each other (which I found indeed very fruitful for my own learning experience). Moreover, and most importantly, the wording of the question did not specify the geographical context in which debentures were supposed to be considered. Additionally, as I know you are aware, many Bocconians have had an educational experience (school, sixth-form, internships) or will later find work in the United Kingdom. Thus, I believe that the British financial context, though not extensively described in our book, is very much relevant and not a far-fetched example of differing accounting practices and definitions. Therefore, I would like to ask you respectfully to clarify my request.	You can get prepared for the exam as you prefer. You can buy the book, access eConnect, do exercises to get better trained for the bonus quizzes. Or, if you deem it better, you can use only the materials uploaded on Blackboard, or you can study only the night before the exam, you can study online on any website or purchase any other book you want, et cetera; you can do what you prefer to get prepared for the exam. We just want to point out clearly that the reference for the exam is the book Libby, 12thedition; that slides of only the 12th version and exercise solutions of only the 12th version of the book will be made available; that eConnect access is available for only the 12th version of the book; that the exercises in the exam will be set and graded based on the explanation provided only in the 12th edition; that eConnect may be useful to improve for quizzes; that no complaints will be accepted based on the fact that something was explained differently in previous editionsof the book, or on the internet,or in any other source that differs from the book. Achieving a high score on this exam requires attending lectures, completing many exercises at home, and studying the book thoroughly. Having stated the above, feel free to do what you want and study from whichever materials you prefer.
My brother studied in Bocconi in 2013 and had the 7th edition of the Libby book. Can I use it, instead of buying this book?	See precedent Q&A.

II. MATERIALS ON BLACKBOARD

The slides of the course and some related explanatory notes, text and solutions of the review sessions, other additional exercises and other materials will be regularly downloadable from the course website through https://blackboard.unibocconi.it

Teachers will make the materials available throughout the course.

III. EXTRA MATERIALS (NOT ASSESSED)

For those students who are also genuinely interested in the topic and wish to learn more than the "exam-covered" topics, rather than only getting a high grade, in a separate section of Blackboard, named "Extra materials", teachers will upload materials (mainly, the Italian/English Accounting dictionary and pieces of newspapers) which will show how "practical" is Accounting, and how important it is in the professional life.

Materials included in this section will not be assessed in the exam.

TEACHING METHODS AND STUDENTS' RESPONSIBILITIES

Accounting Module 2 - 30693 is an "intermediate" course. Hence - although the learning experience is based on face-to-face lectures - more interaction (cases discussion with students) is scheduled and expected throughout the course, compared to Accounting 1 sessions.

Lessons are interactive, as accounting is a very practical course: real-life cases are presented during teaching, with the goal of linking the explanation to the "real world of business and accounts".

- After each set of lectures regarding a certain topic, review sessions are discussed in class: the goal of the review session consists in showing the students how to approach the preparation of journal entries and all other tasks concerning Accounting.
- Case studies will be discussed in class and active participation is encouraged.
- Students need to use their communication and interpersonal skills to actively participate in review sessions.
- Additional materials (exercises, slides, etc.) that are useful for getting trained for the exam are posted on Bboard.

The students' responsibilities are the following:

- students' punctuality is required;
- students must not disturb other colleague students' learning;
- the course is lecture-oriented but the interaction between students and the instructor is still a crucial part of an efficient learning experience;
- individual preparation of the course material, which includes notes, cases, and exercises available on the course website and McGraw-Hill web platform, is strongly recommended. Review sessions shall be prepared before their discussion in class.

ASSESSMENT METHODS

The final grade of the course 30691 – Financial Accounting, registered in the official transcript, is the average of the 30692 and 30693 exam grades.

All students are graded based on a comprehensive exam (there are no partial exams), which is based on a mix of open questions, closed questions, and exercises that aim to assess the student's learning level of the theoretical notions and the main concepts, methods, and tools shared in the course. The final grade is rounded.

The exam session that will take place **on FEBRUARY 2027** *(exact date not available yet)* **will be a written exam**

on a 30-point basis, with no bonuses, no extra points, no other options (applicable for the other sessions; see below).

For the other preceding sessions:

- 28 May 2026
- 17 June 2026
- 04 September 2026

The directions are the following.

In a nutshell, there are TWO possible ways to pass the Accounting exam:

FIRST OPTION **"YES BONUS" = EXAM + POINTS**	**SECOND OPTION** **"NO BONUS" = EXAM ONLY**
• Exam: 25 points. • Quiz: 1,5 points. • FSA Game: 1,5 points. • In-Class Questions: up to 3 points. • Curving (if any)	• Exam: 31 points. • Curving (if any)
Total points: 25 + 1,5 + 1,5 + 3 = **31** + curving	Total points: = **31** + curving
This option is addressed to those students who are happy to be involved in the continuous learning process.	This option is mainly addressed to either (i) students not involved in the continuous learning process, or (ii) students who, although involved in the continuous learning process, are unhappy with the points scored during the semester in the Quizzes and/or the In-Class Questions and/or in the FSA Game.

The choice between the "YES BONUS" and the "NO BONUS" exam type shall be made when students register to sit for the exam. When you register, you can either decide to sit for the "Yes Bonus" exam (25 points, keeping automatically the *[up to]* 6 points scored during the semester through Quiz, Game and In-Class questions) **or the "No Bonus" exam** (31 points exam).

As a consequence of the above, the choice shall be expressed in each exam registration, and you may change your mind between different exam sessions; so, for example, you may decide to register to sit for the "No Bonus" exam on the 28 May session, and then (if you don't pass) you can decide to register to sit for the "Yes Bonus" exam on the 17 June session.

Please find further details about the assessment and grading methods below. Additional information and details will be provided on Blackboard promptly.

I. IN-CLASS QUESTIONS

During the semester, in each class, all professors will be entitled to assign points at their complete discretion, asking random questions anytime during the lesson on the platform Blackboard Ultra at their convenience (the so-called "**In-Class Questions**" in short "**ICQ**").

These questions will be mainly:

- True/false and/or
- Multiple choice and/or
- Fill in the blank

Also if you are in class with your classmates when the questions are released, you shall answer the ICQ individually (*i.e., you can't talk with anyone during the time available*); though, the assessment is open-book (*i.e., during the time available to answer, you can check your notes, textbook, etc.).*

The goal of the In-Class Questions is to keep you engaged in the classroom activities during the semester: we believe that the Intended Learning Outcomes can be achieved at the top level ONLY if you actively[1] follow the lectures and continuously study the materials provided.

The release date and time of the ICQ are not predetermined (*for example, if you have your classes on Monday, do not expect to get the questions every Monday at the beginning of the lessons*).

In general, the ICQ will assess the content of the current or the previous lecture.

Broadly speaking, the professors will release approx. 10 to 12 ICQ, each worth 0,3 / 0,4 points during the semester.

The total number of points students may earn with ICQ over the semester is up to 4 (FOUR). However, only the first three points will be counted. The fourth will remain unused. The goal is to replace the idea of 75% attendance (as passive presence) with active and engaged participation, while still allowing students to miss a few classes (e.g., due to illness) without this impacting their exam grade directly.

NOTE: There is no connection between in-class questions (ICQs) and the Attendance procedure. Attendance is recorded purely for statistical purposes and does not grant any extra points. Assessment and grading criteria are exactly the same for students classified as "attending" or "non-attending."

Naturally, students who attend regularly and follow the lessons actively will likely earn more ICQ points. However, a student who attends only 1 out of 23 classes (and is therefore "non-attending" for Attendance purposes) could still earn, for example, 0.4 points if they happen to be present on a day when an ICQ is given. Conversely, a student who attends all 23 lectures ("attending") might earn zero ICQ points if they answer all questions incorrectly during the semester.

II. WRITTEN EXAM

Students must register to sit for the exam.

At the end of the term, all students have a written exam; except for technological changes in the IT platform used by Bocconi to carry out exams, a part of the exam text (some open-ended questions) will be provided on paper but answers shall be entered on the student's laptop (i.e., no paper), administered through Blackboard Original (i.e., NO Blackboard Ultra) and will use the software Lockdown Browser.

The question types can be grouped as follows:

Closed-ended questions (Multiple Choice, "true or false" and/or Multiple Answer questions), which (in the

[1] Note: "actively" doesn't mean that you shall ask three questions per session [*you may, but you are not supposed to*]; simply, you are expected not to shop online on Amazon.it when the professor is teaching you how to account for income taxes.

"NO BONUS" exam) are **worth approx. 09-13 points,**[2] aimed at assessing the knowledge and understanding of the students, as follows:

- Ability to summarize and illustrate the theoretical tools needed to evaluate:
    - Owners' equity.
    - Investments in other corporations.
- Ability to explain how income taxes are computed.
- Understanding of the categories where to classify a change in cash in the cash flow statement.
- Knowledge of the schemes of F/S reclassification for ratio analysis purposes.
- Ability to describe the main ratios used to analyze F/S (measures of performance, liquidity, and solvency).
- Ability to recognize whether there is or not a "control" as a prerequisite to prepare consolidated F/S.
- Ability to summarize the meaning of the consolidation adjustments when preparing the consolidated financial statement.

Open-ended questions (exercises using drop-down menu, fill in the blank, fill in multiple blanks) which (in the "NO BONUS" exam) are **worth approx. 18-22 points**[3] aimed at assessing the application of the knowledge and understanding of the students, as follows:

- Ability to analyze, evaluate, calculate, and prepare the journal entries related to the following financial statement items, according to law and to accounting principles:
    - owners' equity.
    - Investments in other corporations.
- Ability to calculate income taxes and prepare the relevant journal entries.
- Ability to compose the cash flow statement.
- Ability to reclassify the items according to the commonly used F/S reclassification schemes for ratio analysis purposes.
- Ability to elaborate a F/S analysis (measures of performance, liquidity, and solvency).
- Ability to prepare consolidated financial statement.

The time available for the 31-point exam will be more than that for the 25-point exam. Grades might be curved upwards.

Only basic calculators will be admitted. If a calculator is deemed, at the sole discretion of the exam proctor, to be non-compliant due to advanced functions (even in case of doubt), it will be taken away until the end of the exam. The student may use the online calculator available in Lockdown Browser.

Detailed "Exam Directions" will be provided in a separate document nearer the exam date.

III. BONUS QUIZ (valid for the "YES BONUS" exam only)

One short quiz is given to the students via Blackboard during the course. This quiz may consist of closed-ended and/or open-ended questions. It lasts approximately 10 minutes, and its main goal is to foster continuous assessment.

The quiz does not require the use of Lockdown Browser.

The quiz is not in person, i.e., you do it from home (or anywhere you are, on the date and time of the quiz).

---

[2] As previously said, a student participating to the continuous assessment and sitting for the 25-points exam can opt to keep the points scored during the semester, and so will get fewer questions and points in the exam because he/she has already scored some points during the semester.

[3] See the preceding note.

The release date of the quiz is scheduled on the following date: **April 23 between 08.00 AM and 08.30 AM Italian time** and covers all topics covered in the course up to and including the calculation of goodwill

Detailed "Quiz Directions" will be provided in a separate document nearer the quiz date.

The Quiz is graded between 0,00 and 1,50 points.

IV. "FSA GAME"

A number of sessions of the course are dedicated to FSA cases. During one of these sessions, you will be asked to perform a real Financial Statements Analysis. The date on which this session will be held will be announced by each class instructor in the first weeks of the course (normally, it falls in the first weeks of April).

We will set it up as a game, for part of the session you will be allowed to work in group, with other students, the goal of the activity is to engage you on two real sets of financial statements and show you the practicality of your Accounting studies.

In short, at beginning of the lecture we will announce the name of the company (one different per class), and you will then receive questions about the selected company and its financial statements. Then you perform a F/S Analysis of a competitor, and you compare them.

Questions will be released on Blackboard during the session. Each question will give fractions of points, and you will be able to collect (up to) 1,5 points during the whole session.

Detailed "FSA in-class game" directions will be provided in a separate document nearer the date of the game.

V. COMMON INFORMATION FOR BONUS QUIZ, IN CLASS QUESTIONS & "FSA GAME"

As explained above, if a student decides to register for the 25-point exam and not for the 31-point exam, the (up to) 6 points of the Quiz, Game and ICQ are automatically assigned.
In other words, these points are not "in addition to" the grade of the exam, but rather, these points are "SUBSTITUTIVE" of exam exercises that would be worth 6 points.

NOTE: We remark (again) that the choice whether to keep the bonus points ("YES BONUS") or not ("NO BONUS") is to be expressed when the student REGISTERS for the exam and NOT during the exam.

Otherwise, if a student is unhappy with the total points scored during the semester, he/she can register to sit for the 31-point exam.

The Bonus points (ICQ + Quiz + Game) may be used in the following exam sessions:

- 28 May 2026
- 17 June 2026
- 04 September 2026

In any possible scenario (absence, failure, withdrawal) occurring in one exam session, the points scored are still

valid. They may be used in the subsequent sessions up to September 4th (included).

After 04/09/2026, the Bonus points are no longer valid.

VI. "ACCOUNTING IN ACTION" VIDEOS: CURVING POINTS

As occurred during the first semester, during this second semester educational videos will also be released on Blackboard. These consist of a continuation of the Gpack videos as well as some new videos related to another company.

And, as already happened in the first semester, simply watching these videos by predefined deadlines will allow you to accumulate points that will be used in the event of an adjustment (curving) of the final grade. It will be sufficient to click on "confirm" once you have watched the videos in order to obtain the assigned score.

The only difference compared to the first semester is that, in this case, the videos will not be released all at once, but rather progressively as the topics are covered throughout the months.

The idea behind the teaching model is that the best learning process is: attending the lecture; studying the materials; watching the video (practical application of the concepts learned in real life).

Further details will be provided by the end of February through a specific document.

***

Please note. *The following is a clarification about rounding. When adding up the points of the quiz+ICQ with the points scored in the exam, the grade of the quiz and of the ICQ stays as it is, with only the final grade of the exam 30692 being rounded, and then rounded again with 30693 to total only the grade 30691 in the transcript (please read paragraph "PREREQUISITES" above).*
So, for example, if a student obtains an overall score on the quiz of 1.75 out of 3 and 2.75 out of 4 in the ICQ, so a total of 4.5 out of 6, and the points of the exam are 22.25 out of 25, the total grade of the exam is 4.5 + 22.25 = 26.75, which is then rounded to 27 as the final grade of Accounting 1 (30692).
If the same student gets 28 in Accounting 2 (30693), then ***the final total grade*** *in the transcript of the student will be [(27+28)/2] = 27.50, which is rounded as* ***28 under the course code 30691 "Financial Accounting".***

Frequently Asked Questions about Grading Methods, Quiz etc. ("REAL" are real emails received from students)

QUESTION	ANSWER
(REAL) I am sure I registered to take the exam but I don't result to be registered. Can you please allow me to take the exam although I am not registered to the same?	I am really sorry, but no, only students registered can sit for the exam. The registration is an administrative procedure, and only administrative offices have access to the backend. Professors are not allowed to access the backend so there is nothing we can do to help. Professors are required to admit sitting for the exam only those students registered and visible in the roll call. It is forbidden to professors to admit sitting for the exam anyone not registered.

Dear Professor, I am very sorry but I registered to sit for the “NO BONUS” exam, whilst I wanted to sit for the “YES BONUS” exam. Is there anything you can do to help me?	Unfortunately, no, this is a backend activity and any switch between exam groups after the deadline is an administrative procedure and only administrative offices have access to the backend. Professors are not allowed to access the backend so there is nothing we can do to help. Professors are required to admit sitting for the exam only those students registered and visible in the roll call. It is forbidden to professors to admit sitting, for one type of exam, students registered to sit for another type of exam.
(REAL) In the file “detailed content” it is written that some slides / some pages of the book will not be assessed in the final exam. My doubt is, what about the quiz? Do we have to study everything for it? Or the Syllabus for the quiz is the same as for the exam, so those pages are excluded?	The content covered in the quiz is the same as the content covered in the exam. Therefore, if a topic is excluded, it is excluded from both the quiz and the final exam.
(REAL) Is it obligatory to do both quiz, Game and ICQ in order for them to be valid? I have not managed to do the ICQs due to my full-time employment. Is it possible to do the quiz and game only and then for the exam points to count up to 28 (instead of up to 25 as the syllabus describes and that the quiz and game is graded up to 3)? In that case, obviously, only one quiz question on the exam would be covered.	It is NOT obligatory to do all of quiz, game and ICQ to get the points, BUT the points of the quiz, game and of the ICQ shall be intended as a total, which means that it is not possible (for example) to keep the points of the quiz and game and do an exam of 28 points. The “bonus quiz”, Game and “ICQ” points are to be intended as a single total.
I think in question 3 of the Bonus Quizzes today I answered “Cash” but I wanted to answer “Common Stock” which was the next, so I was wondering if you could change my answer and so change my grade of the Bonus Quizzes.	No. Accuracy is a virtue that shall be awarded.
(REAL) Dear Professor, My name is XXXXXXX and I’m a fuoricorso student, missing his accounting courses to graduate. I am in the blackboard class and I was reading the syllabus, which talks about 2 possibilities of grading, 1 out of 31 points and 1 with quizzes and in class questions. I am studying by myself from Germany and coming only for exam sessions. What can I do to take part in the class questions?	Take a flight and a place where to sleep, live in Milan until May 10, come to classes and answer the in-class questions.
Dear Professor, I was willing to make the Bonus Quiz, but my laptop started a Windows Update and during the release of the quiz the process was still ongoing. So I would like to know whether I can make it in another occasion.	Unfortunately, no. It is your responsibility to have a laptop ready for work, with no processes ongoing. What would you do if you were asked to make a presentation during a job interview and your laptop didn’t work?
(REAL) I am an attending active member of our Accounting course, still for an unpleasant upcoming problem I already know I will not be able to be available to take the quiz on the day scheduled. This implies that I will have to skip the quiz. Is there any way to take the quiz, or any other solution that may come to your mind?	Unfortunately, no, there are no other chances to get the “bonus quizzes”, as the quiz was scheduled since beginning of the course there are no other dates.
(REAL) Dear professor, Can I still take the quiz also if I didn’t attend even one lecture?	As written above, yes.
I honestly do not understand why we don’t have a partial exam.	The bonuses are NOT substitutive for the intermediate exam. We perfectly know that, in the two-three days before the exam, you can study 20 hours a day using the short-term memory and ability of learning, but then you will forget everything. Instead, we want you to study continuously, to be regular and use the long-term

	memory approach. It's like when you have to go to the gym: if you go training for 30 minutes every day, you get always more and more comfortable and your training will be perfect. Instead, if for three months you never go to the gym and, once every three months, you start running on the *tapis roulant* for three consecutive hours, the best you can achieve is a heart attack. We want you to be trained, not to have a heartache!
(REAL) Dear Professor, I withdrew from the Accounting 2 exam, in both the May and June sessions. Are the bonus quiz points still usable in September? Or, given that I withdrew more than one time, the points became unusable?	The points are still valid for the August session, no matter how many times you failed or withdrew or didn't attend the exam in the precedent two sessions.
(REAL) Dear Professor, I received my grade today, and it says I got a 16/30, which is not a sufficient grade, yet it doesn't say "insufficient". What should I interpret this as, because assuming I got a 16/30 I really want to take the exam again, and since it does not say insufficient, I am scared that my grade might be registered into the system, something I can not tolerate in terms of my GPA. please let me know, as I am incredibly set on getting a better grade in this course, and registering a 16/30 for an exam that is supposed to be insufficient seems unfair. Please let me know if I interpreted this wrong.	Provided that final grades are rounded (as explained above), raw grades of: • 17.49 or below are "insufficient". • 17.50 or above are "pass". We don't write the word "pass" or "fail" together with your mark because we assume that you know the general rule above recalled.

ATTENDANCE

Students ' attendance is recorded through the "Attendance" procedure.

As said above, the mere attendance does NOT give any extra points. There are no differences between the assessment and grading methods for attending and not attending students.

CLASS TIMETABLE AND ROOM

Students are required to download the class timetable and classroom from the You@B Agenda and/or the Bocconi website: http://www.unibocconi.it (*Quick reference for> Current Students > Timetables, Calendars and Rooms> ClassTimetable*).

Please often check the class and room timetables, as they may change during the semester.

PAPER SHOW

The paper show will be conducted according to the Bocconi general rules, available in Agenda.

Frequently Asked Questions about paper show ("REAL" are real emails received from students)

QUESTION	ANSWER
(REAL) Dear Professor, I just went through my exam at the paper show. The points scored in my exam were 17 but, due to the curving, my final grade is 18. I would like to refuse the extra point of the curving and be failed to retake the exam.	It is not possible. Curving applies to everyone and it is not an option. Sorry if you were unlucky, but this is not an option which you can decide on.
(REAL) Dear Professor, I just went through my exam at the paper show. I made very stupid mistakes, which costed me a very low "pass" grade. So please, I would kindly ask you if you could withdraw me from the exam, as I really enjoyed Accounting and I'd like to try again the exam.	It is not possible. Withdraws are permitted during the exam, according to the procedural instructions and within the time limit set by the invigilator (usually, 10 minutes before the end of the exam). From that moment on, the exam will be graded.

TEACHERS' OFFICE HOURS

Office hours are held by the professors during the semester at the end of a lecture or in their offices. Also, a Teaching Assistant will be dedicated to make office hours for all students. More information will follow during the semester.

Please remember that instructors are available throughout the semester for their office hours. We kindly ask you not to ask questions via e-mail near the exam date. Please ask your professor how to have an office hour with him/her.

HONOR CODE

Università Bocconi conceives of education as an ongoing process that stretches across a person's entire professional life. The University hopes that the entire Bocconi community will respect the values of fairness and correctness associated with it, values which inspire and guide the conduct of all members as they pursue common objectives and a shared mission. The University Bocconi Honor code is published at http://www.unibocconi.eu/honorcode. We encourage all students to read it.

ACCOMMODATIONS FOR STUDENTS WITH SPECIAL NEEDS

Università Bocconi enables students to follow their course of study and to test their learning through examination arrangements that take into consideration the different kinds of disability. Services for students with special needs are available at www.unibocconi.it **(Home > Services > ISU Bocconi > Other Services > Services for Students with Special Needs).** Please feel free to contact the instructors to receive assistance.

The Course Director is available anytime, in proper advance in respect to the assessment dates, to discuss together with the Delegate of the Rector and with the dedicated offices appropriate measures for unique situations.

STUDENTS BELONGING TO PREVIOUS ACADEMIC YEARS

Exam 30693 will be the same for all students, including students from previous academic years. As explained

previously, these students will be assigned to a class and allowed to get the bonuses.

NOTE:

1) No bonuses of any kind can be carried forward from the previous academic year
2) All previous-years students shall access the Blackboard workgroup created for THIS academic year
3) All previous-years students shall follow the Syllabus and study the materials related to THIS academic year
4) All previous-years students shall retake ALL the quizzes, assignments, tests, and activities provided for THIS academic year

Specific issues shall be submitted via Help and Contact.

OTHER USEFUL INFORMATION

Professors' offices: Accounting Department, 5th floor, via Roentgen 1.

To contact the administrative offices for any bureaucratic need, please use B In Touch; you will receive an appropriate reply in a reasonably short time.

COURSE CONTENTS AND GENERAL SCHEDULE

Dates, timetable and Teachers are indicated, with reference to each specific class, on You@B Agenda.

Session	Book Chapter	Lecture Content
1	11 Libby	Reporting and Interpreting Owners' Equity
2	11 Libby	Reporting and Interpreting Owners' Equity
3	Appendix A Libby	Reporting and Interpreting investment in other corporations: types of investments
4	Appendix A Libby	Reporting and Interpreting investment in other corporations: types of investments
5	12 Libby	Statement of cash flows
6	12 Libby	Statement of cash flows: indirect method
7	11, 12, App.A Libby	*Review Session Owners'equity, investments, statement of cash flows*
8	Materials on Blackboard	Income taxes
9	Materials on Blackboard	Income taxes.
10	Materials on Blackboard	Income taxes. *Review Session*
11	13 Libby and Slides	Financial Statement Presentation and F/S Analysis
12	13 Libby and Slides	Financial Statement Presentation and F/S Analysis
13	13 Libby and Slides	Financial Statement Presentation and F/S Analysis
14	Materials on Blackboard	Financial Statement Presentation and F/S Analysis.
15	*Set Slides 1*	ESG Reporting. *Business case*
16	*Set Slides 1*	Business Combination (BC): Concept of control and the Consolidation Methods.
